Pierluigi Maria **Teotini**

Mechanical Engineer

About me

Mechanical engineer with an MSc in Advanced Automotive Engineering - Racing Car Design (MUNER, Dallara Academy), specialized in CFD, aerodynamics and composite materials. My thesis, developed at R&D CFD, focused on the CFD modeling of a high-pressure H_2 injector. Before that, I designed and manufactured aerodynamic components for Formula SAE. Years of top-level canoe polo have shaped my discipline, resilience and team spirit. I am looking for R&D opportunities in motorsport, automotive and aerospace, where I can keep learning and take on new technical challenges.

Languages

Italian - Mother tongue

English - Level B2

Spanish - Level B1

Soft Skills and Strengths

Team Working | Problem solving | Leadership | Autonomy | Communication skills | Resilience | Stress management | Eye for Details | Ability to Plan and Organize | Analytical thinking | Creativity | Curiosity | Flexibility

Technical skills

CFD | Turbulence modelling | Wind Tunnel Testing | Composites materials | FEM | Vehicle dynamics | Additive Manufacturing | CAD (SolidWorks)

EDUCATION

2022-2026

Master's Degree — Modena | MUNER - Dallara Academy
Advanced Automotive Engineering
Racing Car Design
Thesis: *Analysis of CFD methodologies applied to a high-pressure H_2 injector in support to the design process* - Supervisor: Stefano Fontanesi
Degree: 108/110

Development of engineering design skills for racing cars: vehicle dynamics, aerodynamic development and the use of innovative materials and production techniques.

- **Composite materials**: theory and characterization tests of thermal (DSC), thermomechanical (DMA) and mechanical (tensile, compression, shear) properties, and of bonding resistance between metal substrates.

- **Aerodynamics**: theory courses (Aerodynamics; Turbulence and modeling of turbulent flows - CFD) and a wind tunnel session on cooling-system optimization, using polar curves to reach the target without altering the aerodynamic balance of a single-seater car.

2021-2022

Single courses — Turin
Politecnico di Torino
Aerospace Engineering
Credits required for enrollment in the master's degree in Aerospace Engineering:
- Applied aerodynamics
- Technical design of aeronautic structures
- Aeronautic propulsion

2016-2021

Bachelor's Degree — Firenze | Unifi
Mechanical Engineering
Scientific-mechanical curriculum
Thesis: *Applied robotics to space debris: gripper analysis for capture of cooperative and non-cooperative targets*
Degree: 107/110

General foundation in mechanical engineering; the following courses were the most formative for my later training:
- Fluid dynamics and turbomachinery
- Industrial plants and energy systems
- Mechanics applied to machines and machine design
- Mechanical drawing
- Mechanical technology

EXPERIENCE

11/2025-05/2026

Thesis Internship — Modena
R&D CFD SRL
Master's thesis project on the CFD modeling of a high-pressure H_2 injector: steady and unsteady approaches, with and without mesh motion, and fluid-structure interaction models, in STAR-CCM+, with correlation to experimental data.

2018-2020

Aerodynamic team member — Firenze | Unifi
Formula SAE - Firenze Race Team
- Design of a front wing assembly for a Formula SAE race car in SolidWorks, with CFD validation
- Manufacturing of composite components for the bodywork and aerodynamic devices

2009-Present

Canoe Polo athlete — Firenze
Canottieri Comunali Firenze
Canoeing since 2009; member of the Florence canoe polo team since 2012. The team plays in the top Italian league, whose athletes are recognized as **athletes of national interest**.

Pierluigi Maria **Teotini**

Mechanical Engineer

CERTIFICATES

- Cambridge English Level 1 Certificate in ESOL International, Level B2 (overall score 174) (*2016*)
- Dassault Systèmes certificate in Mechanical Design (SolidWorks Associate) (*2022*)

INFORMATION TECHNOLOGY SKILLS

Programming	**MATLAB**: *Advanced* **C**: *basic knowledge* **Python**: *beginner*
CAD	**SolidWorks**: *Advanced* **3DEXPERIENCE**: *Intermediate*
Modeling and Simulation	**STAR-CCM+**: *Advanced* **Marc Mentat**: *Advanced* **Abaqus**: *Intermediate* **OpenFOAM**: *basic knowledge* **Ansys Fluent**: *basic knowledge* **NASTRAN**: *basic knowledge*
Office Automation	**MS Office (Excel, Word, PowerPoint)**: *Intermediate* **LaTeX**: *Advanced*
